SUMMARY

As a Front-End Developer, I have a passion for creating innovative solutions that improve my technical skills. I have over 9 years of experience as an Independent Distributor, where I build a team of dozens of distributors which got me to the rank of Gold within the company and I learned new skills of what it took to build a home based business. I also have over 6 years of experience as a Lead Recovery Coach at OCTLC, Inc./Sustain Recovery, where I worked with adolescents struggling with mental health and/or drug addictions. As I had to role model the behavior we expected I helped them learn life skills, create structure in their lives, and presented them to a community of like-minded people through a 12-step program. I am currently improving the skill set of Full Stack Development I've learned in Codecademy and Mimo, which I hold certifications for but I am focused on Front-End development and I am taking another course with Scrimba. I am always eager to learn new skills and technologies, and I am committed to using my expertise to make a positive impact on the world.
