Summary

Full-Stack Developer with expertise in JavaScript, React, Node.js, & SQL, passionate about building scalable & efficient web applications. Strong foundation in front-end & back-end development, with experience working on dynamic & responsive projects. Skilled in problem-solving, collaboration, & continuously learning new technologies to enhance development workflows. Currently expanding my expertise through hands-on projects & certifications in full-stack development. Eager to contribute technical skills & creativity to a forward-thinking development team.

EDUCATION

CodeAcademy — Full-Stack Developer

November 2023 - November 2024

Built full-stack applications using JavaScript, React, Node.js, & SQL.

Mimo — Python AI Developer

November 2023 - July 2024

Learned Python for AI, data processing, and automation tasks.

Scrimba — Front-End & AI Engineer

January 2025 - Present

PROJECTS

My First Portfolio Website (HTML, CSS)

Designed and developed a **fully responsive** portfolio website to showcase projects using CSS Flexbox & Grid to create a modern & adaptable UI. The website was Hosted on Netlify for fast deployment.

NFT Website & Plant Blog (HTML, CSS, TailWind)

Developed two responsive web projects to compare styling approaches using CSS & TailwindCSS. Focused on UI fundamentals.

SKILLS

Front-End:

HTML | CSS | Tailwind | JavaScript (ES6+) |
React.js | TypeScript | Python
